

## Magdi Yacoub

Élu Associé étranger le 21 juin 2005 dans la section de Biologie humaine et sciences médicales

---

Magdi Yacoub, né en 1935 en Égypte, de nationalités égyptienne et britannique, Professeur de chirurgie cardio-thoracique à l'Imperial College, est considéré comme l'un des meilleurs spécialistes internationaux de la transplantation d'organes. Chirurgien hors pair, il dirige à Londres le Magdi Yacoub Research Institute et a réalisé le plus grand nombre de transplantations cardiaques et pulmonaires au monde. C'est aussi un chercheur éminent à qui l'on doit des contributions majeures concernant la biologie des valves cardiaques et des transplantations. Soucieux de renforcer les liens entre pays du Nord et du Sud, il anime des programmes chirurgicaux et de recherche épidémiologique au Mozambique, dans le Sud de l'Égypte et à Alexandrie.

*Sir Magdi Yacoub, Professor of Cardiothoracic Surgery, National Heart and Lung Institute, Imperial College Faculty of Medicine, is considered as one of the best international experts of organ transplantation. Head of the Magdi Yacoub Research Institute in London, he is an outstanding surgeon who has performed the largest number of cardiac and pulmonary transplantations in the world. Magdi Yacoub is also a distinguished scientist who brought major contributions to the biology of cardiac valves and of transplantations. In order to reinforce the links between Northern and Southern countries, Magdi Yacoub has developed surgical and epidemiological programmes in Mozambique, South Egypt and Alexandria.*
